

LAMINÉS MARCHANDS EUROPÉENS

AFV BELTRAME GROUP

LEED declaration
(Origin and recycled content in steel products)

Steel products at LME plant are manufactured with steel scraps in EAF furnace. LME is monitoring geographical origin of the scraps supply, and pre-consumer and post-consumer inputs according to ISO 14025 standard (type III environmental declaration), then calculating the recycled content. This information is reported in the Environmental Product Declaration (EPD) and validated by a third party.

MR 4 : Recycled content

Reference plant	Recycled content	Pre-consumer recycled content	Post-consumer recycled content
LME Trith-Saint-Léger	>95%	15%	83%

MR 5 : Regional Materials

Raw material : steel scraps delivered and recycled at Trith-Saint-Léger plant (FR : 59125) :

- Origin 100% < 800 km
- Average distance < 150 km
- Countries origin : France, Belgium, Germany

This reporting data remains valid until an update is published.
