AFV BELTRAME GROUP

Recycled Content Declaration

Dears,

The manufacturing process carried out in DONALAM, Romania, Targoviste in 2024 was based on the hot rolling mills. The steel mill plant did not produce in 2024.

Donalam Targoviste produced in 2024 only in the two rolling mills carbon steel and steel special bars using billets purchased as raw material. We purchase our raw material from suppliers with varying processes to assure we procure appropriate high quality raw materials at competitive prices relative to the specific requirements of each application.

Given that a variety of suppliers are used, the following data summarizes the information regarding recycled content that was supplied to us from each of our melt sources.

Total volume raw materials from all suppliers in 2024 - 109,322.53 tons

Average content of recycled material in finished products 42%

This declaration is based on SR EN ISO 14021:2016 requirements.

Yours sincerely,

DONALAM TARGOVISTE
